**TO WHOM SO EVER IT MAY CONCERN**

This is to certify that Ms. Ritu Kaneriya has completed her internship as a Management Trainee at Unity Trauma Center and ICU from 01<sup>st</sup> June 2022 to 31<sup>st</sup> July 2022.

In order to receive credit, the students internship experience must meet the standard requirements. I affirm that the internship is a total of 48 hours per week. Her topic for the presentation during the internship was **Personality Development** and her topic for the project was "A study on patient feedback with healthcare services in in-patient department (IPD) of Unity Multi Specility Hospital, Surat.

During this period of internship at Unity Hospital she was mainly was involved with the patient feedback by taking daily rounds and making one to one communication with patients and relatives to carry on channelize the feedback process for her project hand in hand on the basis of her finings and suggestion Hospitals Feedback form was redesigned that was easy to understand with limited and required data only. Also, she observed the functioning of several departments of hospital such as HRD, Quality Assurance(QA) , Quality Check(QC) , Finance Department, Medical Record Department (MRD) , Overall Administration Activities. You should note that any informatuon and data collected from you during the course of your internship should be kept confidential at all times.

Her exposure in this area is very good. During her tenure with us, she ably handled given responsibilities and found her to be hard working and a committed team player with adequate knowledge about her work.

We appreciate your interest in Unity Hospital.

Regards,

  
Krina Patel

### TO WHOM SO EVER IT MAY CONCERN

This is to certify that **Dr. Prakash Damor** has completed his internship as a **Management Trainee at Unity Trauma Center and ICU** from **07<sup>th</sup> Febuarary 2022 to 07<sup>th</sup> June 2022.**

In order to receive credit, the students internship experience must meet the standard requirements. I affirm that the internship is a total of 48 hours per week. His topic for the Major project was **A Study to identify Medication Errors**. You should note that any informatuon and data collected from you during the course of your internship should be kept confidential at all times.

During his internship, he was exposed to the various activities. We found him extremely inquisitive and hard working. He was very much interested to learn the functions of our core division and also willing to put his best efforts and get in to the depth of the subject to understand it better.

His association with us was very fruitful and we wish him all the best in his future endeavours.

**TO WHOM IT MAY CONCERN**

**Letter of reference for student of B. Arch; Ms Roshani Panchal**

Ms Roshani Panchal undertook Professional training at our practice as a requirement of her academic curriculum. She joined us on **June 03, 2020 and continued till December 3, 2020.** (All of these days were WFH.)

During her training she has worked on the following projects:

1. **Usha Bohra's Bungalow**, Rajasthan – Bungalow Conceptual Planning, plans, elevations – Renders
2. **Kochi Competition** – Design development, 3d renders, presentation drawings.
3. **Affordable Housing Competition** – Case study of affordable housing projects, Facade options, 3D Graphics
4. **Rainforest Bungalow**, Nana Chiloda – Interior Project – home theatre, false ceiling, room layout options and renders.
5. **Arvind Foundation**, Plans, 3ds and details elevations.
6. **Arvind Foundation Community center**, Design Development and 3Ds
7. **HP Uniyal Home**, Mussorie – Conceptual 3D Model.
8. **Siholi Learning Center**, Chiloda – working drawings door window details.
9. **Resort**, Mussorie – Conceptual Planning
10. **IGBC Certification Green Factory**, ECS Vadodara, Calculations and amenity proximity document.
11. **IGBC Certification Green Affordable Homes**, Narratives, landscape, roof and non-roof calculations.

Ms Roshani Panchal has been an integral part of our team. She is a curious individual who gains by enquiry and questioning. She has quick grasping of subjects even when introduced new, this is acknowledged by the large variety of projects that she managed to get herself involved in while her time at AW Design. During her term, she has been involved with two different IGBC rating projects, which can get fairly technical and only the committed are able to do justice.

Roshani is a very hard-working individual and stays committed to the task at hand. She took complete ownership of jobs that she did for us, be it complex building calculations or time bound projects she ensured to use the correct resources, connect with the relevant team members and deliver on time.

She is a confident individual with a polite disposition and has always offered help to her peers, a quality that is fondly liked by our team members. She can take tasks by herself and at the same time displays great interpersonal skills as a team player. She has always voiced her opinions in discussions about design, architecture and education. Her inputs during project discussions; especially resort projects were professionally formed.

## Project Scenario

Extracting data from multiple data sources like databases, data in files and transforming it into a particular data format, and loading it into a single centralized database for analysis. Implementing web scraping and extracting data with API with Python and transforms the data, load in the Central data warehouse system. we'll be able to start gathering huge datasets from many sources and transforming them into a data warehouse.

## Project Scope

The scope of implementing the ETL process is very niche. ETL tools like Pyetl, Pandas, Microsoft SQL server integrated ETL service, AWS, Apache Airflow, etc. all are in huge demand in the industry because of their ease of use. This project scope includes ingesting data from different data sources into a central data warehouse system. This ETL process in this project will be implemented using Python.

## Conclusion

ETL Process is a type of business process in which ETL developers, business analysts, DBAs are involved. ETL process requires the knowledge of SDLC and ETL policies, and the Developer should know how to write the SQL queries and extract the data from different

**Email :** [info@solutionanalysts.com](mailto:info@solutionanalysts.com)

### Project Scenario:

**Prerequisite:** JavaScript fronted, AWS free tire account.

**Tool:** Amazon Web Service (AWS).

### **Description:**

The part of a website that the user interacts with directly is termed the front end. It is also referred to as the 'client side' of the application. JavaScript is a famous scripting language used to enhancing the functionality of a website.

Amazon S3 (Simple Storage Service) provides object storage, which is built for storing and recovering any amount of information or data from anywhere over the internet. It is designed for developers for easier web-scale computing, it provides 99.999999999 percent durability and 99.99 percent availability of objects.

Amazon CloudFront is a web service that speeds up distribution of your static web content, i.e. JavaScript frontend in our project. CloudFront delivers content through a worldwide network of data centers called edge locations.

Lambda@Edge is a feature of Amazon CloudFront that lets you run code closer to users of your application, which improves performance and reduces latency. With Lambda@Edge,

you don't have to provision or manage infrastructure in multiple locations around the world.

**Outcomes:**

We will get to know what is cloud computing. Different types and use cases of AWS S3. Also hosting static web content on AWS S3. How to create a CloudFront environment.

### Project Scenario:

Nowadays, MERN stack is emerging technology for web apps. In our project we are gonna use MERN (MongoDB, Express js, React js, Node js) stack for building our Hotel management application.

The system aims at the maintenance and management of the different Hotels that are available in the different parts of the world. It mainly takes care of the Hotel management at the core area of the database.

The system provides the information regarding the different Hotels that are available and their status specific to availability. The guests can visit the site and register themselves with the required information that is expected by the system.

Each registered guest can raise a request for the unit bookings. The Guests are scheduled with the information of the availability of the units for they have requested the time

### Hotel Management Webapp :-

#### Pages :-

- ◆ SignUp/SignIn page for (user & admin)
- ◆ User Home page
- ◆ Admin Home page
- ◆ Hotel Preview page
- ◆ Booking page
- ◆ Payment page
- ◆ Complain & Feedback page (user)
- ◆ Create room page for admin

### Features can be implemented :-

- 1] Various Filters includes
  - facilities (like swimming pool, gym, etc)
  - AC/Non AC
  - number of people
  - pricing (high / low / medium)
  - checkin-checkout dates
- 2] User Home page containing
  - near by hotels via location
- 3] Admin page containing
  - managing complain requests
  - booking requests
  - create room and details
- 4] Hotel Page
  - Detailed info about hotel
  - Booking options
- 5] Various payment options
- 6] Covid-19 check
- 7] Chat-bot for FAQs
- 8] Responsive Design
- 9] Real time varying database
- 10] Meal details

### Tech stack :-

#### Tech :

- React js
- React-redux
- Node js
- Mongo DB
- Express js

#### Tools :

- VS code
- Postman
- Git / Github

# PROJECT TITLE

E-commerce shopping website

## Student Details

Hasnain Jafri

Roll No - 2

## Company Details

Natura Micron

- Natura Micron Pvt Ltd was established in 2012 at idar
- The owner of this company is Jafar ali parbadiya
- There are 10+ employees working in this firm

Natura Micron Private Limited

Block No. 603, B/H, Krishnanagar, Idar-Himatnagar Highway  
At & Post. Netramali, Ta.: Idar, Sabarkantha - 383430,  
Gujarat, India.

Tel.: +91 2778 291110 Fax: +91 2778 233284  
Email: info@naturamicron.co

skype: natura.micron web: www.naturamicron.co

## Company Details

E-commerce shopping website aims at providing details about Attars and Perfumes that we make for customers.

Due to this website customers can select perfume based on their personality and they can also customize it with bottles and labels.

This website will provide: - How a fragrance is made, Fragrance Notes, Levels of fragrance concentration.

Our unique feature is that Nowhere else will you find a website that makes it easy to create perfumes and attars. You can order Perfume/Attar at any time from anywhere through our website. Our aim is to attract customers from Elite & Top Middle Class, People between 15 to 60 years.

## Project Scope

The scope of the ecommerce website is the range of services they provide. The scope of an ecommerce website will vary depending on the type of website. For example, an online store will have a scope that includes the products that are visible on the website, while a blog will have a scope that includes the posts

that are visible on the website. The scope of an eCommerce website can also refer to the number of products that a site sells.

Ecommerce websites can have many benefits for businesses which increases the scope of this field. Some of these benefits include more reliable sales, more accurate inventory, more intensive customer service and more efficient marketing. At the most basic level, an eCommerce website can help you to reach more customers, with the growth and evolution of social media, it's easier and faster than ever to reach people.

In today's digital world, people are shopping online more than ever. It's easy to see why eCommerce websites are becoming so popular. By offering a wide range of products, with lower prices than brick and mortar stores people get automatically attracted for purchasing through our e-commerce site once they get to know about it.

## Technology.

### PROJECT TITLE/Definition

#### **Online Auction Management System**

### STUDENT DETAILS

Krunalkumar Thakkar  
Msc(Ca&It)Sem-X

Department Of Computer Science,  
Hemchandracharya North Gujarat University

### COMPANY DETAILS

#### Solution Analysts

#### **Address:**

A-106, Sankalp Iconic Tower  
Near Iscon Cross Road, Ambli - Bopal Rd,  
Ahmedabad, Gujarat 380058

HR Inquiry : +91 (701) 646-3621

**Email:-** [info@solutionanalysts.com](mailto:info@solutionanalysts.com)

### **Project Scenario**

The search for items has always been a mind-chewing activity to most people in the country and in the whole globe. People are always on the go to their renown product supplier, or nearby market center or at times a local hawkers, who goes on to supply items and at times when he cannot get the item the buyer wants, mostly they give their hands to get them items and at times they mess and bring fake and quarks deliver stolen and bad items. This is because unqualified people offer delivery of items to customers.

The Online auction management system shall accomplish the following as way of achieving the major goal:

1. Create an online forum where bidders auction for items posted by the seller through the online system.
2. Create a panel whereby a seller receives requests from a buyer and sends back a feedback, an answer to a question or requests to meet the bidder.
3. To implement and test the workability of the newly developed system.

### **Project Scope**

This system is designed as an online web-based application which shall be accessed by any device, either a computer, tablet, iPad, iPhone, mobile phone or PDAs.

This system is targeted to serve primarily my local town, then by more modification it shall serve the whole country where more business enterprises shall have access to the system and finally reach out to the entire globe.

**Solution Analysts**

Analysing needs, delivering solutions

Using this online auction management system, bidders will be able to get connected to the specific sellers who will offer them necessary information and or give hand to sell their items to them. It will help save time and offer quality deliverables to the bidders by quick response and attention services (Gemino and Parker, 2009). This system will replace the manual way of seeking items in the market and traveling long journeys just to get an item yet there are available items just in the neighbourhood.

The scope of this application is to build a user-friendly auctioning website, where users will be able to auction any product which is available nearby or anywhere in the world. By using Online Auction management system it will be easy for auctioneers to make an auction and time saving also. By making auctions through this application will help to reach the maximum of buyers bidding in the local area. There will be a feature where the bidder and seller can message each other.

**Tools & Techniques**

### **Project Scenario**

Node.js is an open source, cross-platform runtime environment for developing server-side and networking applications. Node.js applications are written in JavaScript, and can be run within the Node.js runtime on OS X, Microsoft Windows, and Linux. we manage the exchange of data between servers and users, develop back-end components, and connect applications with other web services. They also support front-end developers by integrating web-based applications. Web services based on REST-API are known as RESTful web services. These web services use HTTP methods to implement the concept of REST-API. A.

### **QA Scenario:**

1. Cover all the module test cases
2. Execute all the test cases in local environment
3. System testing, regression testing, smoke testing, sanity testing
4. Create or report issues
5. Verify all the resolved issues

### **Project Scope**

js as part of their technology stack. The advantages offered by Node. js are primarily because of its non blocking event loop property which enables it to handle large number of requests easily, thereby lending wide scope for Scalability. Node. js for web development is a revolutionary technology that offers unique features. Developers regard it as one of the most efficient cross-platforms JavaScript environments that can help you build robust and effective REST Apis, mobile applications, and web applications

**To,**

**Ms. Mittal Rameshbhai Prajapati**

**Ms. Kenvy Jayeshbhai Patel**

For your Training at **Yantradhigam Labs Pvt. Ltd.** below is the detail definition of the Project.

This Project includes One Hybrid Mobile Application, One back office Web Application (for Administration work and Sales Order processing) and JAVA APIs to interact with Mobile Application as well as back office Application.

### **Business Use case:**

For Manufacturing Company getting retail order into system is big challenge as most of their Sales person are working in field and cannot create order directly in system. So they will manually take the order in paper and then later on provide the details to company via WhatsApp message or printed paper. This process is time consuming and company did not get real time data. Company also enter these orders manually in the system and then process it.

Retail Order Mobile Application will enable the Sales person to take order directly into their mobile phone and get rid of the manual paper work. The Back office web application will enable The Company to get the Retail Order directly into system where they can process multiple order into one Sales order and process it much faster than ever.

### **Modules:**

#### **Mobile Application:**

- Customer Management ( Create and Edit customer)
- Product Selection
- Distributor Selection
- Retail Order Management ( Create and Edit )
- User Authentication and Authorization

#### **Back end Web Application**

- User Management
- Product Management
- Distributor and Customer Management
- Sales Management
- User Authentication and Authorization

## Project Description

The Restaurant System helps the restaurant manager to manage the restaurant more effectively and efficiently by computerizing meal ordering, billing and inventory control. This system is designed for a indian Restaurant and the interface will be in India base.

The system processes transaction and stores the resulting data. Reports will be generated from these data which help the manager to make appropriate business decisions for the restaurant. For example, knowing the number of customers for a particular time interval, the manager can decide whether more waiters and chefs are required.

This system have multiple modules & sub modules. this all are describe below.

## **Project Scenario**

Node.js is an open source, cross-platform runtime environment for developing server-side networking applications. Node.js applications are written in JavaScript, and can be run within Node.js runtime on OS X, Microsoft Windows, and Linux. we manage the exchange of data between servers and users, develop back-end components, and connect applications with other web services. They also support front-end developers by integrating web-based applications with services based on REST-API are

known as RESTful web services. These web services use HTTP methods to implement the core of REST-API. A.

## **QA Scenario:**

1. Cover all the module test cases
2. Execute all the test cases in local environment
3. System testing, regression testing, smoke testing, sanity testing
4. Create or report issues
5. Verify all the resolved issues

## Project Scope

js as part of their technology stack. The advantages offered by Node. js are primarily because of its non-blocking event loop property which enables it to handle large number of requests easily, the wide scope for Scalability. Node. js for web development is a revolutionary technology that offers many features. Developers regard it as one of the most efficient cross-platforms JavaScript environments. Node.js can help you build robust and effective REST APIs, mobile applications, and web applications.

## Tools & Techniques

- Nodejs
- Angularjs
- MongoDB
- Express
- AWS
- Jenkins
- Terraform
- Selenium
- Jmeter
- Test link for writing test cases (also use excel sheet)
- Browsers-google chrome, firefox (browser compatibility testing)
- OS - Linux Ubuntu

Subject : Project Internship letter for **Mr. Vimal C Khorajiya**

Dear Sir/Madam,

This is to inform you that Mr. Vimal C Khorajiya, student of MSc(CA&IT) final semester, Department of Computer Science, Patan has been granted project internship with Masterly Solutions.

He will be working on our enterprise product Visitor Management System (VMS). The VMS is microservices based multitenant platform. The front-end technologies will be Android, iOS and Angular. The backend will have multiple microservices and will be developed using heterogeneous technologies such as .NET, Java and Python based on the organization needs and reusability across our other products.

Masterly Solutions will be providing required official documents such as project status update, project completion and experience certificates to him as and when needed provided that he fulfils the stated requirements. He will not be given the final source code of the project or any other documents that we consider confidential assets of the Masterly Solutions. He needs to get written approval via email of his mentor before sharing any such details.

During the internship he needs to work for 9 hours a day from Monday to Friday. He may be asked to work on weekend if he has not completed weekly assigned tasks. He needs to share his daily progress via email and send weekly status to management. Considering COVID situation he would need to work from home and he would be asked to work from Masterly Office when pandemic situation improves.

We are looking forward him to start his internship as earliest.

Thanking you,  
Your Sincerely,

**For, MASTERLY SOLUTIONS**

**Project Scenario:**

Nowadays, MERN stack is emerging technology for web apps. In our project we are gonna use MERN (MongoDB, Express js, React js, Node js) stack for building our Hotel management application.

The system aims at the maintenance and management of the different Hotels that are available in the different parts of the world. It mainly takes care of the Hotel management at the core area of the database.

The system provides the information regarding the different Hotels that are available and their status specific to availability. The guests can visit the site and register themselves with the required information that is expected by the system.

Each registered guest can raise a request for the unit bookings. The Guests are scheduled with the information of the availability of the units for they have requested the time

**QA Scenario:**

- 1- cover all the module test cases
- 2- execute all the test cases in local environment
- 3- system testing, regression testing , smoke testing , sanity testing
- 4- create or report issues
- 5- verify all the resolved issues.

Project Scenario

Performance Management System (PMS) is web based application which will be used by the organisations to evaluate their employee's performance from the work they have done in their respective projects. In every organisation, there exists a procedure to measure the performance of each employee based on certain pre-defined set of parameters. This tool will help the organisation to automate this evaluation process with ease.

Project Scope

Performance Management System is allowed to every employee to see their evaluation. Employee can login into the system they can see their evaluation cycle and also see evaluation appraisal criteria.
